İlker Sevim

Senior iOS Developer and Flutter Cross-Platform Developer

Native iOS and iPadOS | Swift and SwiftUI | Flutter Cross Platform

Istanbul, Türkiye | +90 532 176 51 08 | ilkersevim2007@gmail.com
LinkedIn | Website | GitHub | iOS portfolio | Flutter portfolio | Google Play demo

PROFESSIONAL SUMMARY

Senior iOS developer and Flutter cross-platform developer with 10+ years in mobile engineering across banking, payments, telecom and secure communications. Built Turkcell Mailim for iPhone and iPad from scratch, maintained shared iOS frameworks and published a CocoaPods SDK. Combines Swift, SwiftUI, UIKit and Objective-C expertise with Flutter and Dart delivery, native platform integrations, automated releases and mentoring. Uses Cursor and Codex in reviewed, tested development workflows.

TECHNICAL SKILLS

Native iOS and iPadOS: Swift, SwiftUI, UIKit, Objective-C and Objective-C++, Xcode, Swift Concurrency, CocoaPods; SwiftData, watchOS, macOS and tvOS.

Flutter and cross platform: Flutter, Dart, BLoC / Cubit, Riverpod, Provider, GoRouter, Dio, Freezed, json_serializable, get_it; Swift / Kotlin Platform Channels; responsive and adaptive UI.

Native Android portfolio: Kotlin, Jetpack Compose, Room, Coroutines / Flow / StateFlow, Hilt and Retrofit.

Architecture and data: Clean Architecture, MVVM, MVC, SOLID, dependency injection, modularization, REST APIs, GraphQL, offline caching, Realm, SQLite, YapDatabase; Firebase and Supabase.

Quality and delivery: Unit, UI, widget, golden and integration tests; TDD, Git, Fastlane, GitHub Actions, Azure DevOps, Jenkins, TeamCity; App Store and Google Play workflows.

Leadership and AI: Architecture reviews, mentoring, Scrum, distributed teams; Cursor, Codex, reusable AI skills, task context, code review and test verification.

React web: React, TypeScript, Vite, JavaScript, HTML/CSS, CSS Modules and responsive UI.

PROFESSIONAL EXPERIENCE

Freelance Flutter Cross Platform Mobile Developer | Self-employed

Dec 2025 - May 2026 | Remote

- Integrated native iOS and Android components with Flutter using Swift and Kotlin Platform Channels for biometrics, secure credential storage and permission handling.
- Built Flutter features with Clean Architecture, BLoC / Cubit, repositories and dependency injection; documented module boundaries and platform integration decisions.
- Implemented secure JWT sessions, token refresh and logout flows; reusable Dio networking with interceptors, retries and consistent error handling.
- Delivered authentication, profiles, settings, validated forms and offline caching; adaptive UI and focused state updates to avoid unnecessary rebuilds.
- Integrated Firebase Analytics, Crashlytics and FCM, native notifications and deep / Universal Links; automated analysis, tests and build checks with GitHub Actions.

Senior iOS Developer | RealTyme

Apr 2022 - Jan 2024 | Remote

- Maintained and extended the RealTyme iOS app and shared frameworks for secure communication, implementing features and resolving defects across offline access and real time synchronization.
- Implemented end to end encryption for application data and media files; worked on performance and stability in data and synchronization flows.
- Contributed automated tests, CI/CD and peer reviews; partnered with product and engineering stakeholders on delivery and long term maintainability.

PROFESSIONAL EXPERIENCE CONTINUED

Lead iOS and Flutter Developer | Inventiv / Multinet
Aug 2020 - Apr 2022 | Remote

- Led mobile development, coordinated engineers and mentored team members while enhancing MultiPay, GastroPay and Buddy Performance iOS applications.
- Published and maintained the Multipay iOS SDK through CocoaPods / GitHub; wrote Markdown integration documentation to support application teams.
- Automated MultiPay and GastroPay iOS builds and releases with Fastlane, Ruby / shell scripts, Azure DevOps and GitHub Actions.
- Introduced Flutter as a cross platform solution, established initial architecture and practices, and implemented proofs of concept and production features using BLoC and Clean Architecture.
- Built Flutter demos with REST APIs, Firebase and secure local storage; evaluated BLoC / Cubit, Provider and Riverpod for different state management needs.
- Presented native and Flutter delivery tradeoffs and maintainability considerations; trained iOS developers in Flutter and supported architecture decisions.

Lead iOS Software Developer | Ericsson / Turkcell
Dec 2018 - Feb 2020

- Built the universal Mailim / Yaani Mail iOS app from scratch for iPhone and iPad, with an offline first architecture and shared application structure.
- Worked with design and engineering teams on architecture, API contracts and UI / UX; used Swift 5, Objective-C, Realm and CocoaPods in a Scrum workflow with Jira, Git and Zeplin.
- Delivered Mailim across iPhone and iPad form factors, applying native platform experience to feature and release decisions.

Mobile iOS Software Developer | Intertech Information Technology and Marketing Inc.
Sep 2017 - Dec 2018 | Istanbul

- Developed and maintained banking and payment applications including DenizPos, fastPay and Deniz'e Çek Gönder.
- Contributed native iOS implementation and ongoing product maintenance in a financial services environment.

Senior iOS Software Developer | Triodor Software
Aug 2012 - Sep 2015

- Built 10+ native iOS applications for Lely Industries and its InHerd agriculture platform, including System, Cow, SystemToday and FarmVisit; automated builds and localization with shell scripts.
- Developed Qt / QML cross platform applications including ConnectTier, UptimeKing and Roadbook; integrated Objective-C++ on iOS and Java / JNI on Android for push notifications, camera / gallery access and media playback.
- Enhanced Governor of Poker 2 and Jaludo entertainment products; developed Speeleiland with distinct iPhone / iPad interfaces and localized targets sharing one codebase.

Mobile Software Developer | AMVG
Apr 2011 - Jul 2012

- Developed Turkcell TV Plus for iPhone / iPad and Carrefour applications for iOS / Android, using native Objective-C / C and Java with Xcode and Eclipse.
- Built the Hürriyet Emlak iPhone app from scratch as its sole developer, integrating SOAP / XML services.
- Created Ekşi Sözlük and Burger King applications for Nokia Symbian WRT using HTML, CSS, JavaScript and jQuery.

iOS Developer | Spexco
Feb 2011 - Apr 2011

- Developed TRT Radyo Kaşif for iPhone and iPad.

SELECTED PROJECTS AND OPEN SOURCE

- Native iOS and iPadOS portfolio: SwiftUI, SwiftData, async / await and actors, feature layers, dependency injection, offline caching and UIKit interoperability. Includes unit / UI tests, CI, WidgetKit / App Intents, Flutter add to app, watchOS, macOS and tvOS demos.
- Flutter engineering portfolio: BLoC / Cubit, Clean Architecture, Dio, Freezed, offline synchronization and Swift / Kotlin integration. Includes unit, widget, golden and integration tests, CI and architecture documentation. Published Flutter demo on Google Play.
- Native Android portfolio (personal): Kotlin, Jetpack Compose, Room, Flow / StateFlow, Hilt and Retrofit; offline feed caching, persistent CRUD, deep links, repository and Compose UI tests. https://github.com/redjadet/super_demo_android
- React web portfolio: React, TypeScript and Vite; reusable components, typed content, CSS Modules, responsive layouts, keyboard focus and reduced-motion support; GitHub Actions deployment.

Published Dart packages

ilkersevim_type_safe_bloc | Source — Compile time safe BLoC selectors, builders and listeners.

ilkersevim_async_utils | Source — Deduplicated async work and rejection of stale results.

ilkersevim_async_lifecycle | Source — Lifecycle management for completers and stream controllers.

ilkersevim_json_isolate | Source — JSON parsing in isolates for large maps and lists.

ilkersevim_safe_parse | Source — Predictable typed parsing of dynamic JSON values.

ilkersevim_retry | Source — Retry policies with backoff, jitter and cancellation.

ilkersevim_disposables | Source — Disposable bags for subscriptions, timers and lifecycle cleanup.

ilkersevim_relative_time | Source — Relative timestamps for chat and feed interfaces.

AI ASSISTED DEVELOPMENT

- Use Cursor and Codex for architecture exploration, scoped implementation, debugging, refactoring, test generation and documentation; maintain a strong interest in AI tooling and practical best practices.
- Apply reusable AI skills, repository instructions and task context to follow project conventions; define acceptance criteria and review proposed changes against architecture decisions.
- Review generated code and diffs, verify APIs against official documentation, and run static analysis, relevant tests and simulator checks. Protect secrets and private project data; retain engineering judgment and ownership of delivered code.

EDUCATION

Master of Business Administration Remote MBA | Maltepe University, Turkey | 2012 - 2014
Program delivered in English.

BSc Computer Engineering | Işık University, Turkey | 2006 - 2010
ÖSYM Academic Merit Scholarship | Grade 3.0 / 4.0 | Program delivered in English.

Science and Mathematics Track High School Diploma
Mustafa Saffet Anatolian High School, Turkey | 2002 - 2006 | Grade 4.5 / 5.0

Middle Schools
Bilfen, Turkey | 2001 - 2002; TED Istanbul College, Turkey | 1999 - 2001

CERTIFICATIONS

Registered Apple iOS Developer | Developer license QPG8754DYH

Micro1 Mobile App Developer | Outstanding Performance during Interview | June 2026

Flutter Course | Simplilearn | Jan 2026 | Certificate 9769653

Scrum Education Certificate | Projera | 2019

C++ Course Completion | SoloLearn | 2016 | Credential 1051-880010

LANGUAGES AND INTERESTS

Turkish and English fluent in written and spoken communication. Interests include gaming (particularly mobile games), AI, blockchain, DeFi, Web3 and agricultural technologies. No military obligations.
